Princess Alexandra Hospital	326:49:32	78:09:55
Queen Elizabeth Hospital	467:44:18	65:11:21
Southend University Hospital	133:15:34	88:38:04
Watford General Hospital	190:27:20	74:40:56
West Suffolk Hospital	241:29:23	134:16:30
TOTAL	4197:51:11	2047:38:21

What this information means:

Handing over a patient from an ambulance to a hospital emergency department is expected to take no more than 15 minutes. Ambulance crews then have a further 15 minutes in which to complete any outstanding paperwork, make sure their vehicles are clean and meet infection prevention standards and to restock with essentials such as clean linen. Delays beyond these times mean a poor experience for the patient waiting to be admitted into the hospital but also delays ambulance vehicles returning to the front line and being available for another emergency call in the local community.

In this table, column 1 – arrival to handover – shows the number of hours lost where the patient handover has been delayed (i.e. the patient has waited with the ambulance crew for more than 15 minutes before being accepted by the hospital staff) and column 2 – handover to clear - shows that once handover has been achieved, how many hours are lost (over 15 minutes) in completing the task of making the vehicle ready to go to another patient.

The impact on EEAST resources means that at any one time EEAST loses at least 60 ambulance hours per day waiting to handover patient care to hospital staff. With the average crew shifts being 12 hours, that means 5 twelve hour shifts are lost every day of the year where crews are unable to take the next call or back up a colleague who is in the community with a patient who needs conveying to hospital.
